VARIANT C

The Variant C frame (plate) is designed for athletes who execute double-rotation jumps, as well as sit-spins and camel-spins. “Click-action” mechanism that allows for heightened precision with truck-adjustment, maintaining their orientation even during more complex movements and skating. Frame derived from a drawn aluminum bar, and completely created using computer numerical control (CNC) machining. 13 mm king-pins inclined to 16° with traditional trim. Natural rubber cushions available in 4 hardnesses (colors). Aluminum trucks with 7mm steel axles and adjustable pivot pin. Toestop and tool kit included.
