

Bearings Abec 3

Bearings are a fundamental component of the skate and guarantee (if correctly maintained) an optimal level of roll for the wheels. The ABEC 3 bearings are designed for intermediate-level roller skating, and are the optimal pair for the Magnum wheels. Offer an good level of roll. Suitable for all plates with 7 mm axles. Steel casing with a semi-shielded 7-ball cage, open on one side to facilitate cleaning Provided in sets of 16 (It is at the discretion of each reseller to sell units in smaller quantities). If used extensively (for frequent training and competition), it is advised to replace the bearings every 6 months to guarantee the optimal performance of the equipment. Regular cleaning and lubrication contributes to a better lifespan of the product. It is advised to verify the condition of your equipment at every use. In particular, it is advised to check: the correct roll of the bearings, which must be fluid and free of noise the secure closure of the lock nuts on the wheels It is advised to periodically clean the bearings, being mindful to: Remove the bearings from the wheels using the correct bearing press use the specific products of the Roll-Line© range for the cleaning and the lubrication* avoid harsh products such as alcohols, gasoline, etc.
