

PIRANHA

Frame for professional use with light titanium alloy structure. Maintaining the proven lowered structure already present on the previous titanium model, the innovative design of the central part of the insole represents the maximum mechanical evolution in lightness, speed, resistance to stress. Right and left insoles made by milling from solid bar, inclined with double brake screw, crosses with axis and adjustable titanium tip that make it lighter. Precision-click steering adjuster with elastomer suspension available in 5 hardnesses.
