

SATURNO

The Saturno frame (plate) is designed for intermediate-level skating, and is utilizable for the discipline of Loops. The Spin is a frame without a toestop, designed specifically for Figure and Loop skating. The 20° inclination of the king-pins render this a versatile frame, utilizable for both figures and loops. It comes furnished with a set of natural rubber cushions for the execution of Loops, and a set of elastomer cushions (included as an accessory) for the execution of Figures. "Click-action" mechanism that allows for heightened precision with truck-adjustment, maintaining their orientation even during more complex movements and skating. Frame derived from a drawn aluminum bar, and completely created using computer numerical control (CNC) machining. 13mm king-pins inclined to 20° with traditional trim. Aluminum trucks with 7mm steel axles and adjustable pivot pin. Tool kit included.
