

Elastomer Suspensions EVO

The Cushions re a fundamental part of the skates and must be always maintained for a maximum state of efficiency. The cushions for the Evo frames are specific to these models. Made with elastomer, they provide a quick and fluid responsiveness that permits a correct execution of edges. Constituted of an upper part (larger), and a lower part (smaller). The upper cushion for the Evo frame has a lowered profile which offers a better center of gravity, providing better precision and balance. The lower cushion has a particular, flattened profile which allows for an optimal precision in the centering of spins. Available in 5 hardnesses (colors). Supplied in kits of 8 pieces (4 upper or 4 lower).
